Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-6 and 22-24 drawn to three layer golf balls of certain thicknesses, flex moduli and hardnesses, classified in class 473, subclass 374.

II. Claims 7-21, drawn to golf balls of certain rebound and COR, classified in class 473, subclass 378.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions The two balls are not used together. The two groups each have property limitations not required by the other. In addition, group I requires an intermediate layer that is not required by group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Stephanie Scruggs on 3//4/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
